

ARC Data Protection Services

We are Arc Data Protection Services.
Your Data Protection Partners.

And we've got your back.

Our mission is to make data protection as understandable and hassle-free as possible whilst integrating our knowledge and expertise within your team.

Who are ARC Data Protection Services and why choose us?

We are ARC, part of Barnsley Healthcare Federation, which has been around for aeons. Meaning we have the heritage, backing, expertise and certified GDPR colleagues and practitioners available to us, thus enabling ARC to be created. At Barnsley Healthcare Federation we've been managing the data for our many GP practices so we are particularly well-placed to look after your organisation.

We quickly realised that since the inception of GDPR back in 2018, the data protection landscape would change quite rapidly, hence creating our own in-house Data Protection team to assist local businesses with such vital issues.

We fully appreciate and understand how daunting a task it can be to remain compliant. Let's face it, it's a crucial part of your business and one wrong move could result in untold misadventures within your business.

That's where ARC come in. Read on to discover how we can help your business and make your data protection processes invincible.

What we do and how we can enhance your team.

Whilst you may not have the need for a full-time DPO (Data Protection Officer), it is a role which requires experience and specialist data protection expertise. You can use our services as you see fit. To project manage, to set you on the right path, or to be there for the full journey. It's up to you.

Our DPO will integrate themselves within your business; they'll become part of the team. They'll even learn how many sugars you want in your tea. We get that close.

By following tried and tested best practice methods, we will help you look after your reputation and the data you process for your customers, suppliers and employees.

How we do it.

Through our accreditation, we make it look easy. Our pragmatic and practical solutions mean assurances that you benefit from knowledgeable, hands-on data protection professionals. We'll treat your business like it was our own and support you with the following:

- Our bespoke Data security and protection toolkit ensures you're ticking the correct boxes.
- Data Protection training and guidance as and when required.
- Data Protection and Information Governance policy and procedure, including privacy notice writing and updates.
- Data Protection Impact Assessments.
- Investigations into any data breach incidents, including ICO reporting.
- Introduction of relevant procedures to assist colleagues within the workplace.

Why do I need a DPO and what would they do?

If you're still undecided as to whether or not you need an outsourced DPO, these are some of the most commonly asked questions. If they resonate, then give us a call.

- Do I need a DPO? - EU and UK law states that organisations that process data must designate a DPO.
- What would a DPO do? - A DPO will inform and advise your company on all things data protection and sharing of said data. They will oversee risk, manage communication with the ICO, review and update policies, plus much more.
- Is it worth the investment for my business? - Absolutely. Our DPOs are highly experienced, knowledgeable and perfect for companies requiring a pragmatic, solution-focused approach.
- How much would a DPO cost my business? - Clearly, this depends on the complexity of the needs of your organisation.
- Can a DPO help with GDPR compliance too? - Yes. Our DPOs are experts in GDPR so can, if you so choose, assist with implementing a compliance model thus improving your organisation's compliance.

How we can help.

Fundamentally, we believe that using ARC means you will benefit from all our combined experience and a whole host of other benefits.

- **COST-EFFECTIVE** – Outsourcing to ARC means no need to pay for holidays, sickness or any other employment liabilities
- **DESIGNATED DPO** – Our EU GDPR certified practitioners will work either at your business or remotely with your team so you get the same DPO throughout your journey with us.
- **BEST PRACTICE** – We already work with many other businesses, offering our outsourced DPO services, so you can benefit from pre-existing documentation and best practice.

ARC Data Protection Services

What happens next?

If you'd like the peace of mind, knowing that a reputable, qualified DPO from a trusted business is in your corner, then all you need to do is ask.

We're here to help put your Data Protection worries to rest.

Let us cost-effectively enhance your business and provide a solution to improve your overall security, compliance and adherence to Data Protection laws, including GDPR.

Do the right thing.

Gain trust with your clients, colleagues and suppliers alike by having a robust data protection and GDPR framework in place.
